The process being duly followed, the decision of the committee is final. For avoidance of any doubt these include, but are not exclusive to, written or verbal abuse, intimidation, harassment, bullying, attempted or actual physical violence, and damage to property; any action that may bring the Society, Directors, Employees or Membership into disrepute will not be tolerated. Any member, connected or not to the incident, witnessing any act that violates the code should in the first instance report this to the Chairman or a member of the Society Council. Any contravention of the code will be dealt with by the Disciplinary Committee on a case-by-case basis, and sanctions to the privileges of membership of The Society will be imposed depending on the severity in nature of the incident. These may include, but are not limited to, being barred from Society sales or having their membership revoked.

This is an accurate record at time of print. For our full up to date information, please visit our website for codes of conduct, constitutions and by-laws.

Conditions of Entry and General Information DSSS

1 **ENTRIES** – All animals entered must be fully registered and, on the Grassroots Database, with all fees paid at least 7 working days before the date of sale entry. Failing to do this will result in the animal being ineligible to be sold.
All sheep must be tagged in accordance with the rules of Dutch Spotted Sheep Society and with the relevant DEFRA regulations. The vendor shall be responsible for the correctness of identity.

2 **METHOD OF SALE** – All sheep will be sold in guineas (105 pence) and in catalogue order unless alteration is announced by the auctioneer. A market commission at the mart's rate will be charged on all sheep sold, plus a further 1% sales levy, which will be paid to the DSSS.
Graded animals will always be sold after all the purebred animals in MV and non MV sections.

3 **CONDITIONS OF SALE** – The sale is held subject to the Livestock Auctioneers Association Conditions of Sale and the Rules of the DSSS.

4 **UPSET PRICE** – The minimum upset price is set at 300gns (200gns for Graded females). Sheep unsold but passing inspection will be allowed into subsequent Society Sales but not on the same day.

5 **MAEDI VISNA** - All sheep from MV Accredited flocks will only be accepted into the market and penned for sale if they are accompanied by a current and correctly completed Maedi Visna Accreditation Scheme Certificate.

6 **NUMBERING** – All entries must be identified by their catalogue number by means of a neck tie or by numbers printed clearly on the animals back in paint and will be sold in catalogue order.

7 **SUBSTITUTE ENTRIES** – All substitute entries MUST BE NOTIFIED to the Registrations Secretary not less than 3 days before the sale. Substitute entries must be marked with a RED DOT ON THE SHOULDER. Substitutes are limited to 1 per vendor per section. Animals can only be substituted by another animal of same age and class. Animals not notified to the Registrations Secretary in the allotted time will be refused entry into the sale.

8 **INSPECTIONS** - All sheep will be subject to an official society veterinary inspection before the sale. Society representatives appointed by the society will assist with inspection administration. *Vets will take direction from the Trustee in attendance on behalf of the Society.* The inspector is empowered to disbar any animal which in his/her opinion does not meet the necessary standard. The decision of the inspector(s) will be final. Any animal failing inspection on structural or conformational criteria will not be allowed to be sold on the day of the sale, nor any other Society sale in the same year. Neither the Inspectors, the Society nor the Auctioneers will be liable to the owners of such animals or any other person or company for damage or any loss arising from rejection.
Sheep rejected from the sale must be marked with a YELLOW DOT ON THE LOIN and should be **immediately** moved well away from the sale's penning area and not further exhibited for sale; no advertising, promotion or sale of such a sheep is allowed on market premises.
Any sheep withdrawn from a sale, passing inspection and gone through the ring, but unsold will be allowed to enter subsequent Society sales but will have to be presented for inspection again.

Inspection Criteria - ALL SHEEP MUST BE PENNED BEFORE THE INSPECTION COMMENCES

- **Lot Number**: The lot number must correspond with the number entered in the catalogue. Animals without the correct identification will be rejected from the sale.
- **Disease**: the animal is not suffering from any infectious disease.
- **Mobility**: sheep should be mobile and sound with no feet and/or leg structural issues.
- **Teeth** to be assessed whereby if any incisor teeth that are felt beyond the pad, as demonstrated by catching on fingers when running from the pad downwards, or when they are so far beyond the pad that they do not catch the finger, will be rejected.
- **When males are being sold**, testicles should be of even size, move freely and be free from abnormalities. Ram lambs present at Summer and Autumn Society Sales must have a minimum scrotal circumference of 28cm. Shearling Rams must have a minimum scrotal circumference of 33cm. Ram lambs presented at Spring Society Sales are not required to be measured.
- **When females are being sold**, the udder should be correct and free from abnormalities.
- **Note:** Animals which do not meet animal *welfare standards* such as lame animals will be rejected from that sale, however, are eligible to be entered for future sales in that year, provided they are inspected and pass inspection at that future sale.
- ***Important Note: Although the animals have undergone a veterinary inspection according to the DSSS inspection criteria, it remains the responsibility of the party or parties purchasing stock at society sales to ensure they are satisfied with the quality and standard of the animals before engaging with any purchase.***

9 **SHOWS AT SALES**: Shows at society sales will be for MV Accredited animals only and no show will be held at a Society sale if there are fewer than 30 purebred animals entered.
Animals bred by the judge cannot be presented for judging.

10 **SETTLEMENT AND CLEARING OF STOCK** – Settlement in full is due immediately at the close of sale. No animal must leave the sale premises without an official "pass slip" obtainable only from the Auctioneers upon settlement.

11 **EXPORT TO NORTHERN IRELAND** – As of the 1st January 2021, the rules for exporting sheep from Great Britain to Northern Ireland and the European Union have changed. – No direct export or vendor returns will be available under current animal health rules. It will be the responsibility of the purchaser and/or vendor to make necessary arrangements for the sheep going to Northern Ireland.
DISCLAIMER- the responsibility for export of sheep rests with either the purchaser or the vendor and not the Dutch Spotted Sheep Society or Auction Company accommodating the sale.

12 **FLUSHED SHEEP** – where females have been flushed, with or without, embryos being recovered before the sale must be declared in the catalogue and announced at the time of the sale. Failure to do so will result in the purchaser having the right to return the sheep – costs may occur.

13 **SEMEN** – rams being sold where semen is being retained, details must be disclosed at the time of sale.

14 **FLOCK DISPERSAL** – In prior agreement with the society, a full flock dispersal can take place on the same day as a Society sale, but not as part of the main sale and must be catalogued in a separate publication; There can be one dispersal sale only per flock and no further sheep can be registered for the flock once a dispersal sale has taken place.
Dispersal sheep will not be inspected, and will not be eligible for showing.
If advertised alongside the society sale, then the levy fee applicable to the main sale will apply.

Unlock the Genetic Potential of Your Texels

Genotyping provides the confidence and information today's breeders and buyers rely on, delivering:

+ Verified pedigrees through parentage verification
+ Valuable health information (see table below)
+ More accurate performance figures, particularly in young lambs
+ Greater confidence when selecting future breeding stock
+ Faster genetic progress in commercially important traits
+ Trusted information that adds value for potential buyers

	Scrapie	**Microphthalmia**	**Maedi Visna**
Most resistant (desirable)	ARR/ARR	G/G	1,1 4,4 1,4
Genetically resistant, need careful breeding selection	ARR/AHQ ARR/ARH ARR/ARQ	C/G (Carrier)	
Little resistance, need careful breeding selection	AHQ/AHQ AHQ/ARH AHQ/ARQ ARH/ARH ARH/ARQ ARQ/ARQ		
Susceptible, can be used to breed towards more resistance			*,1 *,4 1,* 4,*
Most susceptible			2,2 3,3, 2,3

ET donors (born from 2025-onwards) and males to be registered must be genotyped otherwise their progeny will not be able to be added to iTexel.

All other stock can be genotyped to provide more flock insights. DNA kits can be requested for any animal as soon as it has been added to iTexel.

Scan the QR code to learn more about the Society's genotyping service

New Stock Rams

Remember to register your new stock rams before 1st December to benefit from the lower registration fee.

Already genotyped?

- Email registrations@texel.co.uk with your proof of purchase.
- Once confirmed, your ram will be transferred into your flock.

Not yet genotyped?

- Request a DNA kit through the DNA Kit page on iTexel.
- Take the sample and return it to the Society office.

Performance Pays with Texel Indexes

Breed Better. Buy Smarter. Reduce Risk.

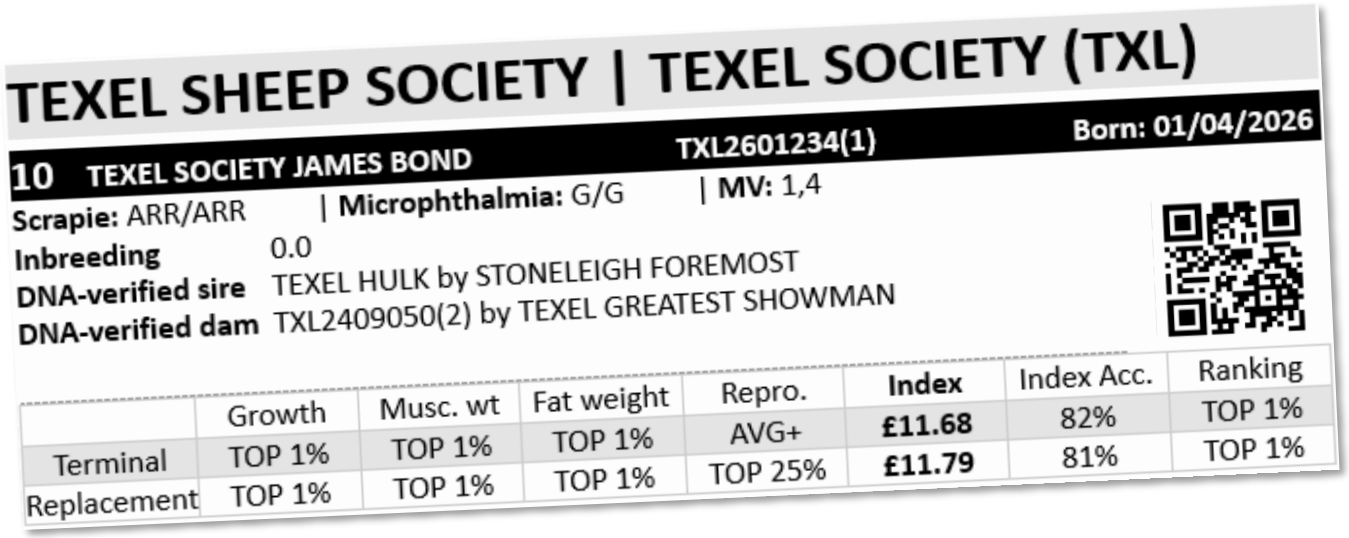

Texel Performance Indexes are designed to help commercial producers and pedigree breeders identify animals with the greatest potential to improve flock profitability.

Higher Value = Higher Potential

Animals are ranked to make selection simple; high index Texel rams (Top 5% and above) add over £650 to their commercial progeny compared to those ranked as average.

Which Index?

Prime lamb producers should use the **terminal index** as this is weighted for meat production. Pedigree breeders and producers retaining female replacements should use the **replacement index** as this balances maternal and carcass traits.

Replacement	TOP 1%	TOP 1%	TOP 1%	TOP 25%	£11.79	81%	TOP 1%

Sub-indexes for growth, muscle and fat weight and reproduction allow breeders and commercial producers to identify animals that offer advantages in areas to suit their production goals. E.g. targeting a ram that ranks highly for fat weight for mating to lean females, to produce lambs that finish well.

Accuracy Matters

Indexes are backed by an accuracy percentage - giving confidence in how reliably an animal will pass traits on to the next generation. Higher accuracy reduces risk and supports confident breeding decisions.

Why Use Performance Information?

- ✔ Improve flock efficiency
- ✔ Breed replacements with stronger maternal traits
- ✔ Increase carcass value
- ✔ Make informed purchasing decisions
- ✔ Select genetics with confidence

Seller Comments: Sweet Gimmer. Very flashy. One of two gimmers offered today that directly descend from Ettrick Fancy Lass who we purchased as a ewe lamb for 3000gns. This one a granddaughter. Her dam this year had stunning twin ewe lambs by Premier Gambler. One of which we will keep the other was the first pick of a private buyer. As her dam bred so well to our Gambler tup it was an easy decision deciding who to breed this girl to.

Seller Comments: Possibly saved the best till last breeding wise. This gimmer is out of the most successful individual ewe in our flock. Has multiple successful offspring and her offspring have always gone on and done exceptionally well too. She's gone back to the ram for her 7th crop of lambs so longevity in that breeding as well.
By the super successful Corra Hendrix.
